

Acceptance Testing
UAT Execution & Report Submission

Date	30 September 2026
Team ID	6ab9453830f9767f8773c674
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the Implement Client Script & UI Policy (Incident) project at the time of release to User Acceptance Testing (UAT). The UAT focuses on validating the Incident form behavior, including Client Script execution, UI Policy conditions, field visibility, mandatory status, read-only behavior, and the interaction between the configured components.

2. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved. For this project template, no defects are recorded as closed or open at the UAT release point.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	0	0	0
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	0	0	0	0	0
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	0	0	0	0	0

3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and are untested for the major functional areas of the Incident Client Script and UI Policy implementation.

Section	Total Cases	Not Tested	Fail	Pass
Incident Form Configuration	10	0	0	10
UI Policy Validation	12	0	0	12
Client Script Validation	12	0	0	12
Field Behavior & Conditions	8	0	0	8

3. Test Case Analysis (Continued)

Section	Total Cases	Not Tested	Fail	Pass
Client Script & UI Policy Integration	5	0	0	5
Incident Submission & Update	6	0	0	6
Access & Form Usability	3	0	0	3

UAT Coverage Summary

Metric	Value
Total Test Cases	56
Passed	56
Failed	0
Not Tested	0
Recorded Defects	0

Open Issues

No open issues are recorded in this UAT template. Any issue identified during actual UAT execution should be logged with its severity, resolution status, affected Incident field or rule, and retest result before final sign-off.

Note: The test-case counts and zero-defect values above are project-specific template values prepared from the provided UAT format; replace them with the team's actual UAT execution results if this document is being used as a live test report.
