

USER ACCEPTANCE TESTING (UAT) TEMPLATE

Date	30 September 2026	Team ID	6ab9453830f9767f8773c674
Project Name	Implement Client Script & UI Policy (Incident)	Maximum Marks	-

1. PROJECT OVERVIEW

Project Name: Implement Client Script & UI Policy (Incident)

Project Description: This project implements Client Script and UI Policy configurations in ServiceNow Incident Management to improve form behavior, validation, and user experience. Client Scripts are used to perform client-side actions based on user interactions, while UI Policies control field visibility, mandatory status, and read-only behavior according to defined conditions.

Project Version: Version 1.0

Testing Period: 30 September 2026 to 30 September 2026

2. TESTING SCOPE

Features and Functionalities to be Tested:

- Client Script functionality in the Incident form.
- UI Policy functionality in the Incident form.
- Field validation and user input handling.
- Mandatory field behavior.
- Field visibility and read-only behavior.
- Incident form submission.
- Proper execution of configured conditions.
- Correct behavior during Incident creation and update.

User Stories / Requirements to be Tested:

- As a user, I should be able to create an Incident with the required information.
- As a user, I should receive appropriate validation when required information is missing.
- As a user, I should see fields change according to the configured UI Policy conditions.
- As a user, I should be able to submit the Incident when all required conditions are satisfied.
- As an administrator, I should be able to configure and verify Client Scripts and UI Policies.

3. TESTING ENVIRONMENT

URL / Location: ServiceNow Cloud Dimensions DEV / Training Instance

Credentials: Configured ServiceNow training-instance credentials

4. TEST CASES

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Create a new Incident	1. Open ServiceNow 2. Navigate to Incidents 3. Click New	New Incident form should open successfully	New Incident form opened successfully	Pass
TC-002	Verify Client Script functionality	1. Open Incident form 2. Enter/change required	Client Script should execute according to	Client Script executed as	Pass

4. TEST CASES (CONTINUED)

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-005	Verify mandatory field behavior	1. Open Incident form 2. Trigger configured UI Policy condition	Configured field should become mandatory	Field became mandatory as configured	Pass
TC-006	Verify read-only / visibility behavior	1. Trigger configured condition 2. Check affected field	Field should become read-only/visible/hidden as configured	Field behavior matched configured policy	Pass
TC-007	Submit valid Incident	1. Enter all required details 2. Click Submit	Incident should be created successfully	Incident was created successfully	Pass
TC-008	Update Incident	1. Open existing Incident 2. Modify relevant info 3. Save	Changes should be saved successfully; scripts/policies work	Changes were saved successfully	Pass

5. BUG TRACKING

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	No functional bug identified during testing.	Not Applicable	Low	Closed	Client Script and UI Policy functionalities worked according to the configured requirements.

6. SIGN-OFF

Tester Name	Anithashree tt
Date of Test Completion	30 September 2026
Signature	T.T.Anithashree

NOTES

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
